

Minidizer Hybridization Oven

Description

Minidizer is a personal desktop hybridization oven ideal for use in laboratories with low usage and space requirements. Due to its low weight, the device is easy to transport.

Minidizer is a personal desktop hybridization oven ideal for use in laboratories with low usage and space requirements. Due to its low weight, the device is easy to transport.

Features

- Compact size is excellent for limited bench space
- Rotation speed set at 12 rpm
- Precision temperature controls
- Bottle capacity of four 35 x 150 mm bottles, four 50 ml and eight 15 ml conical plastic bottles
- Consistent, repeatable results achieved with microprocessor controls
- Chamber interior is stainless steel fabrication with a beta blocking acrylic cover
- Cover swings down for easy access to the bottle carousel
- Carousel pops out of chamber for easy insertion or removal of bottles

Technical Data

Temperature range	+10°C bis +80 °C
Temperature accuracy	± 0,5°C bis 68 °C
Temperature uniformity	± 0,1°C bis 68 °C
Heating element	500 Watt
Rotation speed	12 U/min
Material	innen: rostfreier Stahl Fenster: stabiles Acryl
Display	LED
Carousel capacity	4 x 35 mm x 150 mm bottles, 8 x 50 ml tubes or 8 x 15 ml tubes
Dimensions (H x W x D)	External: 229 x 330 x 203 mm Internal: 216 x 216 x 168 mm
Weight	ca. 5 kg
Item No.	104.1604

Accessories

- Lead-free borosilicate glass bottle
- Cap from Polypropylene and Teflon seal (chemical resistant)
- Size: 35 x 150 mm
- The bottles have an excellent long-term reliability
