

SafetyCR

UV Safety Goggles for Cleanroom

Description

Equipped with an extra wide field of vision, model SafetyCR has been developed to meet the requirements of cleanrooms under sterile conditions.

The goggles are autoclavable at 134°C.

These goggles provide total comfort and optimum protection in sensitive and sterile environments with their ultra-soft thermoplastic rubber frame.

Equipped with an exclusive PLATINUM anti-fog and anti-scratch coating on both sides, the autoclavable reusable goggles are resistant to high temperatures. Still fully functional even after several autoclaving cycles.

The design of the safety goggles allows them to be used over all common prescription glasses and provides improved eye protection and better vision.

Blocks wavelengths from 200 - 380 nm.

Specifications

- Extra wide field of vision
- Adjustable headband
- Fits over prescription glasses
- Platinum coating (scratch-resistant and fog-free)

Modell SafetyCR

Technical Data

Weight	127 g
Frame type	Direct and indirect top ventilation and indirect bottom ventilation.
Frame material	TPV
Material glasses	Polycarbonate
Frame colour	White
Colour of glasses	Clear
Head band	Adjustable with swivel joint Material: Isoprene
Autoclavable	at 134°C
Standards	EN 166, EN 170
Coating	Anti-Fog Anti-scratch coating
Accessories (optional)	Headband for better hold
Standards	AS/NZS 1337.1:2010 ANSI Z81.1-2015
Order No.	110.4803
